 100% MADE IN AUSTRIA | PRODUCT CATALOGUE 2024

Your continuing
satisfaction is our
prime concern here
at Biohort.

Dear Customer,

Biohort products offer you the best quality, functionality and security. Our customers especially appreciate the durability and low maintenance of our storage solutions.

Biohort garden sheds have proven their durability in over 30 years of outdoor service. We are an Austrian manufacturing company with highly-trained and skilled workers. Biohort uses only top-quality materials from tested suppliers to manufacture its products. The high-quality steel we use is supplied by the same worldwide renowned Austrian and German steelworks in which German premium car manufacturers place their trust. This is the reason why we can offer our customers a 20-year guarantee against corrosion with a clear conscience.

Let Biohort help you realise your gardening dreams without a care in the world: with the SmartBase and SmartBase^{PLUS} foundation solutions, free delivery and installation service, completes our offer to a real complete solution. Find out more on page 5.

Sophisticated design and the high Austrian quality standard applied in the manufacturing process creates products that you will enjoy for decades.

We personally vouch for this.

Free Delivery

Dispatched within 2 to 4 days!* We will deliver your order free of charge directly to your home address (delivery free kerbside). The given address must be accessible for a 38-t lorry (3 m minimum width of access).

*for stocked items, except outbuilding CasaNova®

Assembly Service

Biohort will be delighted to help you find an assembly partner who will assemble your purchase professionally. You can find more information on installation and the recommended prices at:

www.biohort.com/assembly-service

Assembly Videos

To help with the assembly, we have created short assembly videos for many of our products. You can find them on our YouTube channel:

www.youtube.com/biohort

The Biohort All-Around Service Package

All-In-One Solution

We guarantee our customers long-lasting satisfaction with our high-quality, durable products. In addition, we also offer you a complete service package. Our **customer service department** will always deal with your concerns personally as quickly as possible - regardless of the size of the concerned product.

Through our trained **installation partners**, we can also guarantee the comfort of a professional installation. The **foundation solutions** SmartBase and SmartBase^{PLUS} are available for all shed types and are built faster and cleaner than expensive concrete foundations. Together with our online tools such as the **product configurator**, Biohort offers the most complete service on the market!

Foundation Solutions

The foundation solutions SmartBase and SmartBase^{PLUS} form a stable foundation for Biohort garden sheds, the Equipment Locker and MiniGarage. The foundations are storm-proof and quick to install.

More information on pages 28 – 31 and at:

www.biohort.com/foundation

Product Configurator

The Biohort 3D-Configurator visualises within a few clicks each product including the individually desired accessories and even calculates the final price. Not enough: the handy augmented reality function allows you to virtually position the product directly in your garden via smartphone or tablet.

Factory 2 Herzogsdorf

Everything **Made in Austria**

Biohort has always produced in Austria, and we are very proud of this fact. There are now three large sites in the western Mühlviertel region of Upper Austria. We have deliberately chosen this

region with a highly skilled workforce. This enables us to produce in the best possible quality.

This is What We Stand For!

Quality

- 20 year guarantee, see page 82 for details
- Hot-dipped galvanised, polyamide coated steel
- Screws and hinges made of stainless steel
- Lifetime maintenance free
- Rainwater proof
- Production in Austria

Stability

- Double the plate thickness compared to low-cost providers
- Optimal constructional design
- Storm proof up to 150 km/h, wind force 12*
- High snow load* of up to 150 kg/m²

Functionality

- Extensive range of standard equipment
- User friendly
- Large selection of accessories
- Wide range of applications

Service

- Home delivery included in the price
- Short delivery time
- Assembly manual with photos / 3D illustrations for easy assembly
- Consultation from the Biohort Service Team
- Assembly service available on request

Security

- Locking mechanism with a cylinder lock
- Fireproof

*Only applies to garden sheds when professionally assembled and anchored.

A Company With History:

The Beginnings of Biohort

In the 1970s, we produced garden sheds at the Normstahl plant in Niederwaldkirchen. Later, in 1994, Biohort GmbH was founded and in 1997, Dr. Josef Priglinger took over 100% of Normstahl's Biohort shares.

At the turn of the millennium, Biohort was already listed in most Austrian construction and DIY stores and became increasingly well-known in the German-speaking world. Through the years, Biohort established itself as the market leader in Europa.

Continuous Product Development

In the early days we produced various garden sheds, metal composters and planting beds. The garden shed Europa was presented in 1996 and is still a classic. More and more different models followed, almost every year Biohort surprises with a new idea. The current portfolio can be found in this catalogue. In addition to the development of new products, we are constantly improving and expanding our existing products. Innovation and quality are our top priorities!

Revolution in Design & Functionality

The Best From Decades of Experience - The Biohort Top Product

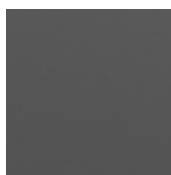

Smooth wall surfaces and the elegant acrylic glass panel in the door characterise the modern look. Additional glass panels can be flexibly installed thanks to a specially developed panel system. To ensure a pleasant atmosphere, the wooden ceiling regulates the humidity along with the optional grey white interior panelling and insulation.

Metallic

Quartz Grey

Metallic
Dark Grey

Size 2B, Metallic Dark Grey with Side Canopy
Back and side walls as privacy screens are available separately (see accessories, p. 24).
Tip: The glass panel and FloraBoard are also available for the side canopy.

Advantages

Security:

- 3-way locking mechanism with stainless steel door handle
- Storm proof up to 150 km/h, wind force 12
- High snow load of up to 150 kg/m²
- Screw and rivet free surfaces

Functionality:

- Comfortable door opening with gas spring
- Optional interior panelling and insulation
- Integrated roof gutter

Standard Equipment:

- Tinted glass in the standard door
- Wooden ceiling made of 19 mm plywood with a 1.5 mm EPDM roofing membrane
- Rainwater downpipe (2 pcs.)
- Tool holder (2 pcs.)
- Tool hanger (2 pcs.)
- Shelves (2 pcs.)

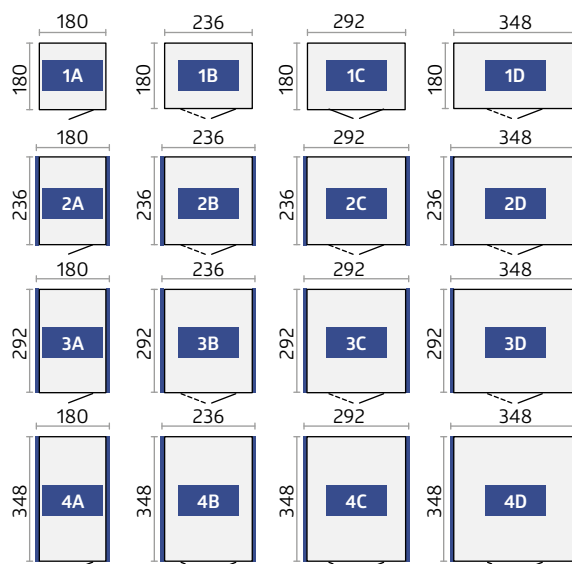

Sizes (in cm, outer dimensions incl. roof overhang)

Door opening:

Standard door (right door hinge): 83 x 200 cm (W x H) - the standard door can be installed on the sides of the shed.

Double door: 167 x 200 cm (W x H) - the double door can be installed on the sides of the shed from 236 cm.

The blue bar markings on the gutters are there to indicate onto which side (from size 2A onwards) the optional side canopy can be attached. See page 24 for details.

Optional accessories can be found on pages 22 – 31.

Technical data and detailed information can be found on pages 84 – 85.

HighLine® Size H2, Metallic Dark Grey
(with aluminium floor frame, aluminium floor panels
and double door as accessories)

HighLine®

An Example of Design and Technology

The Garden Shed HighLine® Fulfills the Highest Standards

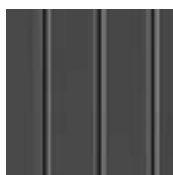

Sophisticated industrial design in an impressive form: The modern flat roof and the integrated all-around skylight give the HighLine® strong accents. The 3-way locking mechanism with a robust cylinder lock ensures optimum security. The opening and closing of the door works semi-automatically with the help of a gas spring. The HighLine® shed is absolutely maintenance-free!

Metallic
Dark Grey

Size A3, Metallic Dark Grey with Slim Double Door

AvantGarde® ECO

ECO Version at an Attractive Price!

Size A5 in the ECO Version, Metallic Quartz Grey with corrugated standard door

For particularly price-conscious buyers, we recommend the ECO version with corrugated door and T-handle cylinder lock.

With integrated organiser system on the inside of the door and door hooks instead of the gas spring. **The ECO version is supplied without the standard equipment, which makes it so attractive in price.** Door opening and sizes, just like the AvantGarde®. Also available with corrugated double door.

Advantages

Security:

- 3-way locking mechanism with stainless steel door handle / 2-way locking mechanism in the ECO Version
- Storm proof up to 150 km/h, wind force 12
- High snow load of up to 150 kg/m²

Functionality:

- Integrated gutter with a connection for a 1 1/4" hose
- Acrylic glass skylight with roof overhang

Standard Equipment*:

- Tool holder (2 pcs.)
- Tool hanger (4 pcs.)
- Shelves and support rails (2 pcs. each)
- Comfortable door opening with gas spring

*not included in the ECO version

Sizes AvantGarde® and Avantgarde® ECO

(in cm, outer dimensions incl. roof overhang)

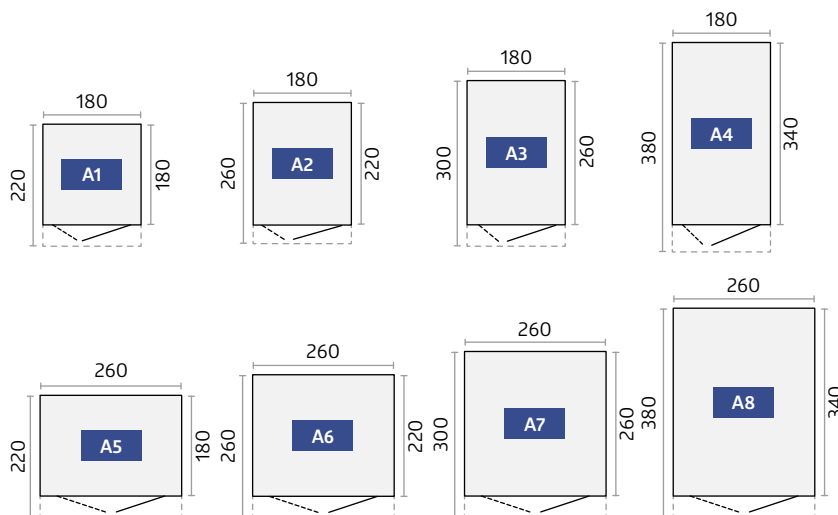

Door opening:

Standard door (right door hinge): 76 x 182 cm (W x H)

Double door A1 – A4: 139 x 182 cm (W x H)

Double door A5 – A8: 155 x 182 cm (W x H)

The dotted lines mark the roof overhang.

Optional accessories can be found on pages 22 – 31.

Technical data and detailed information can be found on pages 86 – 88.

Europa Size 3, Metallic Quartz Grey
(with aluminium floor frame and aluminium floor panels as accessories)

Europa

Quality at a Reasonable Price

Everything Well Organised with the Biohort Classic

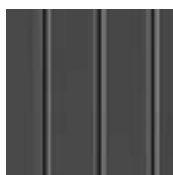

Proven and tested for decades and still very popular! More than 150,000 units of the Europa appliance house have been sold and the proud owners enjoy them. The high stability, durable materials and free maintenance are the reasons why. The functional features simplifies your gardening work and establishes order in your garden. An extensive range of standard features and sophisticated accessories fulfil your needs.

The BikeLift® Advantages

-  bike lockable
-  lift function for bikes weighing up to 30 kg
-  suitable for tyre widths of up to 77 mm/ 3 inch

The Biohort BikeLift® can be mounted on the wall in the cellar, in the garage or carport in just a few easy steps. It is even easier to install in a Biohort shed – the BikeLift® is simply hooked in there as an optional accessory.

The innovative lift is available in two variants:
Standard or with Swivel Mount

Comfortable lift function for every bike

From e-mountain bike to racing bike – the Biohort BikeLift® pulls any bike vertically up the wall as if by itself. This saves space and is effortless.

Hook in

Simply hook the front wheel into the BikeLift®. The hook fits all tyre widths up to 77 mm.

Push

A short downward push on the handlebars is enough to activate the automatic lift function.

Lift

Thanks to its strong spring force, the BikeLift® pulls every bike up to a weight of 30 kg as if by itself.

Save space

Securely fixed and lockable, the bike hangs vertically on the wall to save space.

★ Optional Accessories

		Neo**	HighLine®	Panorama®	AvantGarde®	AvantGarde®ECO	Europa	Equipment Locker
23	BikeLift® Standard The mechanical bicycle lift is simply hooked into the wall profiles and is suitable for bicycles with an outer tyre diameter of up to 29 inches, a tyre width of max. 77 mm, a total height of the rim incl. tyre of max. 77 mm, a maximum bicycle length of 1.95 m and a maximum weight of 30 kg. The end of the rear mudguard and the luggage carrier must not protrude beyond the tyre. Integrated locking eyelet for bicycle locks.	★	★	★	★	★	★	
24	BikeLift® with Swivel Mount For even more space saving, the bike can be folded to the side of the wall thanks to the device. In the garden shed Europa, the BikeLift® with swivel mount can only be mounted centrally on the rear wall.	★	★	★	★	★	★	
25	Threshold Access Ramp For outside and inside, for convenient crossing of the threshold, only possible with aluminium floor frame and double door. Load bearing capacity of max. 200 kg, length: 135 cm (exception garden shed Neo: 163.5 cm).	★	★	★	★	★	★	
26	Bicycle Hanger BikeMax Garden Shed Europa: height-adjustable in 6 different positions, for bicycles up to 26 inches, with a tire thickness of max. 5 cm and a weight of max. 25 kg. Garden shed Neo, HighLine®, Panorama®, AvantGarde® and AvantGarde®ECO: height-adjustable in 8 different positions and suitable for bikes with up to 29" wheels. Integrated locking eyelet for bicycle locks.	★	★	★	★	★	★	
27	BikeHolder Optimal storage of bicycles thanks to the adjustable retaining clamps. The base plate can be easily slotted into 2 support rails*. Quick and easy securing of the bicycle tyres for a maximum of 3 bicycles per BikeHolder.	★	★	★	★	★	★	

*Support rails not included in the delivery (exception garden shed Neo: no shelf support rails are needed).

**Attention: Garden shed Neo does not have any corrugations like the other garden sheds, this has not been taken into account in the illustration.

Conventional Foundation Solutions

More information in foundation brochure and at: www.biohort.com/foundation

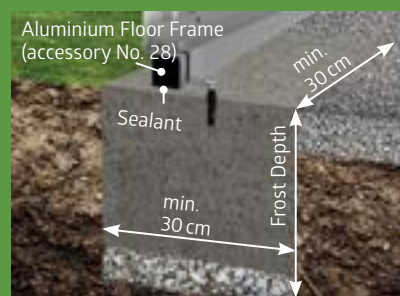

Concrete Foundation

A reinforced concrete foundation slab on a gravel base is an optimal, but also expensive foundation. With this type of foundation, you must also make sure that no water can penetrate into the shed at ground level. The offset foundation with a circumferential step of 2 cm x 7 cm is the ideal design for this (aluminium floor frame and aluminium floor plate cannot be used).

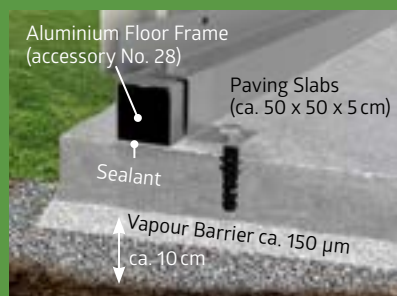

As an alternative to the stepped concrete foundation slab surface, a continuous flat concrete slab can also be poured. The **aluminium floor frame**, available as an accessory, facilitates the levelling of any uneven surface. The aluminium floor frame also allows the use of the **aluminium floor panels** and an underlayment with XPS rigid foam boards (not included).

Point Foundation

Another option for erecting garden sheds on uneven ground is a point foundation in conjunction with an **aluminium floor frame**.

Paving Slabs

A good and inexpensive solution are paving slabs on a gravel base. We strongly recommend the use of the **aluminium floor frame**.

Floor Frame

With the **aluminium floor frame**, you can also set up and anchor the shed on a gravel bed (floor anchors available as accessory). The **aluminium floor panels** serve as a functional floor and is underlaid with XPS hard foam boards (not included in delivery).

Biohort SmartBase Solutions

Detailed information on the SmartBase and SmartBase^{PLUS} can be found on pages 29 – 31.

★ Optional Accessories

		Neo	HighLine®	Panorama®	AvantGarde®	AvantGarde®ECO	Europa	Equipment Locker
28	Aluminium Floor Frame It gives the shed the necessary stability even without a concrete foundation. If the floor frame is laid directly on a gravel base (approx. 10 cm gravel, without foundation or slabs), ground anchors are required for securing to the ground. These are available as accessories – please refer to the technical data for the number of anchors. Storm resistance must be ensured by the customer for this foundation solution.	★	★	★	★	★	★	★
29	Aluminium Floor Panels Depending on the size of the house, the high-quality aluminium chequer plate floor consists of several segments including connecting profiles. To ensure the optimal fitting, the aluminium floor frame is necessary (see above). Underlayment with a fill or XPS hard foam boards in a thickness of approx. 2-3 cm recommended (not included in the scope of delivery).	★	★	★	★	★	★	★
30	SmartBase The perfect floor for solid ground (concrete or paved surfaces). Light ground irregularities of up to 40 mm can be compensated. See details on next page.	★	★	★	★	★	★	★
31	SmartBase^{PLUS} Optimum solution for slopes and lawns, patented system with ground screws to compensate for slopes of up to 15 cm. See details on next page.	★	★	★	★	★	★	★

28 Aluminium Floor Frame

30 SmartBase
Details see on next page.

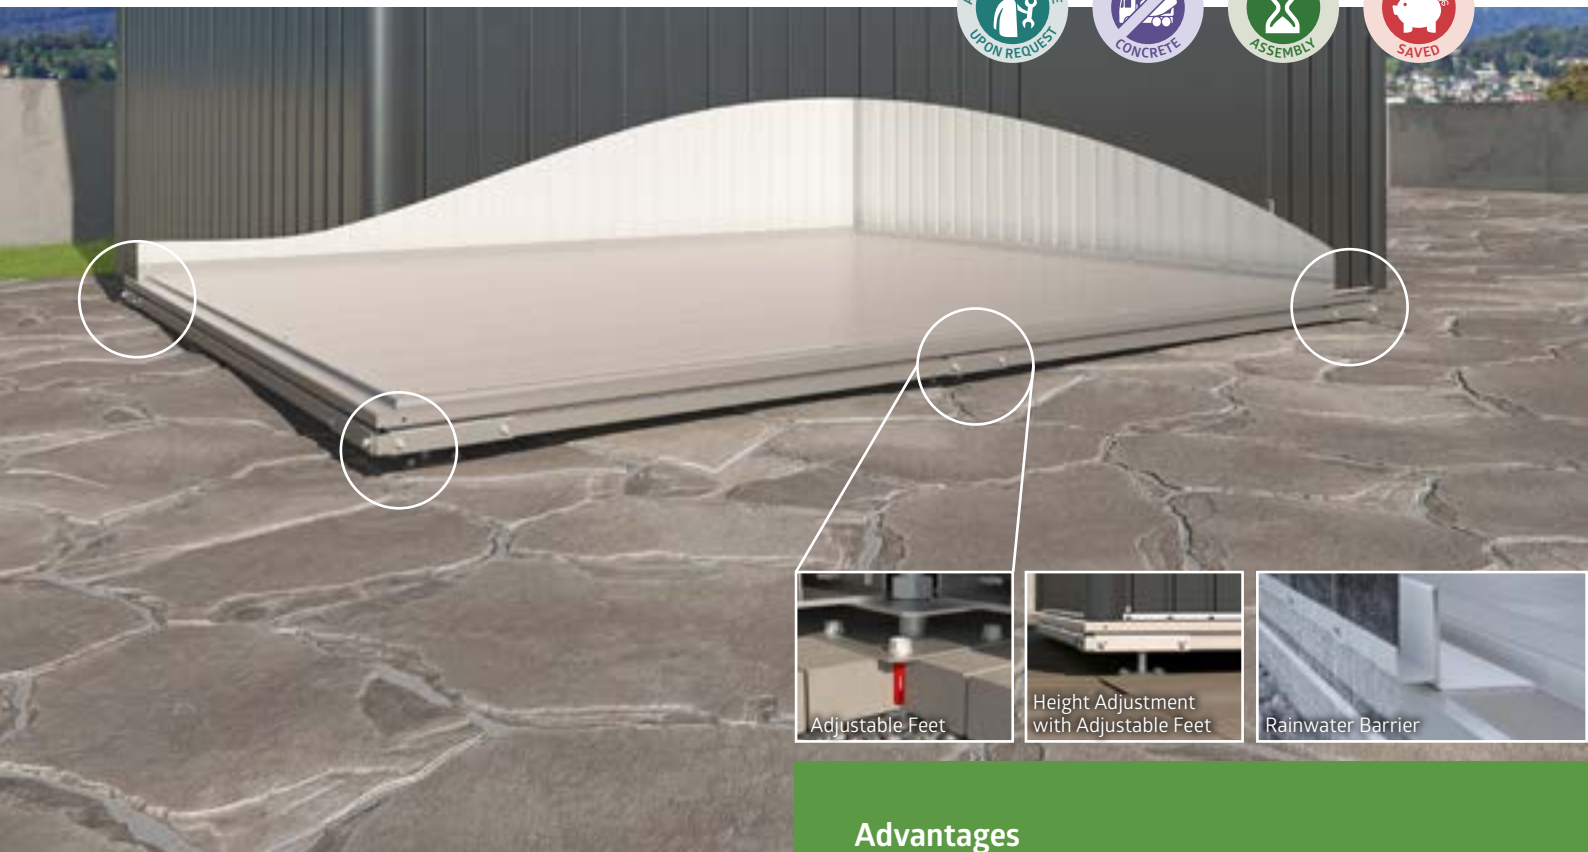

29 Aluminium Floor Panels

31 SmartBase^{PLUS}
See details on next page.

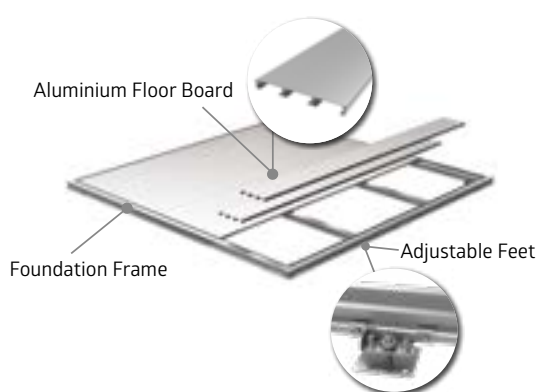

SmartBase

Perfect for Hard Surfaces

The Biohort SmartBase Foundation is the ideal foundation for concrete or paved areas. It consists of high-quality aluminium boards, a special foundation frame and height-adjustable feet. So light ground irregularities of up to 4cm can be compensated.

Time of assembly: 1 – 2 hours for two (depending on workmanship and product). **Tools required:** spirit level, drill, open ended spanner 13 and 24.
1. Frame assembly
2. Connection of adjustable feet and frame alignment
3. Fixing the adjustable feet to the subsurface
4. Fixing of aluminium floor panels

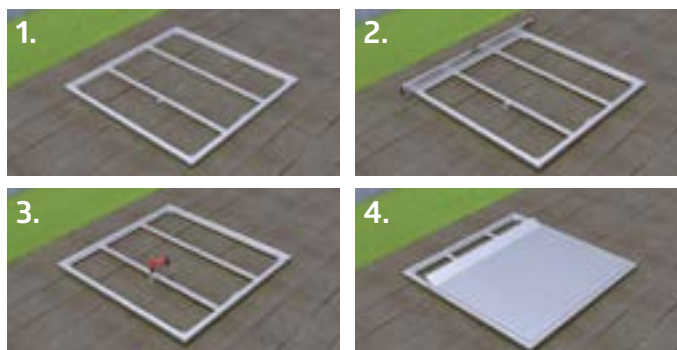

Advantages

- Compensation of unevenness through adjustable feet
- Easy to remove if necessary
- Precisely fitted to all Biohort garden sheds, the Equipment Lockers and the MiniGarage
- Storm proof
- Load bearing capacity max. 200 kg/m²

Standard Equipment:

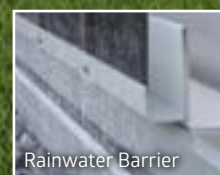

- Aluminium floor boards with grooved surface
- Specially designed foundation frame
- Galvanised adjustable feet
- Adjustable feet with height adjustment
- Integrated water barrier to protect against water ingress

Floor frame and floor plates are no longer necessary!

Height Adjustment with Ground Screws

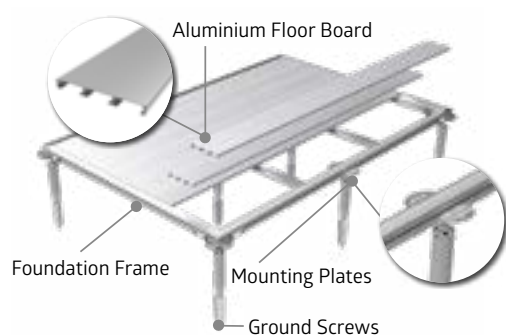

Rainwater Barrier

SmartBase^{PLUS}

Optimal Solution for Slopes and Lawns

Unlike the SmartBase foundation, the patented SmartBase^{PLUS} system includes ground screws instead of adjustable feet. These are screwed directly into the ground and can compensate for slopes of up to 15 cm (extensions are available on request for larger height differences). For this, the soil should be compact and free of large stones.

Time of assembly: 2 - 4 hours for two (depending on workmanship and product). **Tools required:** hammer drill, drill bit Ø 40 x 570 mm, spirit level, drill, open-end spanner 13 and 24, shovel.

1. Site preparation and ground screw insertion
2. Attachment and levelling of mounting plates
3. Positioning and attachment of frame
4. Fixing of aluminium floor panels

Advantages

- Little excavation
- Gravel base is not necessary
- Compensation of unevenness through ground screws
- Easy to remove if necessary
- Precisely fitted to all Biohort garden sheds, the Equipment Lockers and the MiniGarage
- Storm proof
- Load bearing capacity max. 200 kg/m²

Standard Equipment:

- Aluminium floor boards with grooved surface
- Specially designed foundation frame
- Galvanised ground screws
- Multi-adjustable mounting plates
- Including manual screw-in driver
- Integrated water barrier to protect against water ingress

Floor frame and floor plates are no longer necessary!

Optional Glass Elements

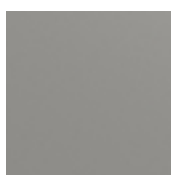

CasaNova® 3x5, Metallic Quartz Grey
(with aluminium floor frame, exterior lighting, two glass elements and double door as accessories)

CasaNova®

Design, Customised to Your Requirements

The High End Metal Building with Insulated Side Walls

Whether as a garden shed, workshop or sauna - the insulated design outbuilding Casanova® provides unique flexibility with a wide range of equipment options and adapts exactly to your ideas. No matter if you are looking for functional storage and place to store your plants during winter or if you want to establish an oasis of peace in your garden: with the CasaNova® you can make your wish come true at a unique quality level.

Tip: All sizes are available in three different heights!

★ Optional accessories available on pages 70 – 71.

 Standard Equipment
 Optional Accessories

		Raised bed	Belvedere®
01	Sliding Panel* Easy to empty thanks to sliding panel.		
02	Preparation for Irrigation Opening for watering hose on the narrow side (size: 17 x 17 mm, except raised bed 2 x 2 and 1.5 x 1.5).		
03	Rodent Protection Integrated rodent protection made of fibreglass fabric. Is inserted before filling.		
04	Intermediate Floor* The intermediate floor reduces the volume of the bed and the soil filling required, saving both money and valuable time. It is placed on the second corrugation during assembly.		
05	Cold Frame Extension* Efficient frost protection with 4 easily removable sliding panels. Storm proof and equipped with rainwater drainage (suitable for size 2x1). Cannot be combined with Trellis (09).		
06	Snail Guard* It is placed on top of the raised bed. Can be combined with a cold frame extension (05). Not available for L sizes.		
07	Skirting* The skirting is mounted on the floor frame and placed on the lawn. The raised bed is then placed on the skirting and fastened (cannot be installed afterwards). Width: 6.7 cm		
08	Planter Insert Plastic insert (size: 0.5 x 0.5 m) for easier planting, is placed on the intermediate floor. Holes for drainage can be drilled without any problems.		
09	Trellis* The trellis is attached directly to the raised/planting bed. Cannot be combined with cold frame extension (05) or snail guard (06). Height: 91 cm		
10	Privacy Screen* with or without tinted glass panel In conjunction with the planting bed, the privacy screen forms a decorative boundary and serves not only as a privacy but also as a windscreen. Cannot be combined with cold frame extension (05) or snail guard (06). Height: 91 cm Note: In places exposed to wind, the product with privacy screen is at high risk of tipping over, therefore it is essential to ensure adequate ground anchorage - using the fastening materials supplied.		
11	Heights-Variants The three planter heights enable demand-oriented use. Height: 45 cm (Mini), 61 cm (Midi) and 77 cm (Maxi)		

*Made from galvanized, polyamide coated steel.

Privacy Screen consisting of:
Wall panels and posts

The posts can be used as end, corner or connecting post between two privacy screen panels.

Advantages

- Individually configurable
- Extremely durable
- Simple assembly
- Privacy, wind and sun screen
- Screw and rivet free surfaces

Security:

- High wind resistance due to well-thought-out ground anchoring

Functionality:

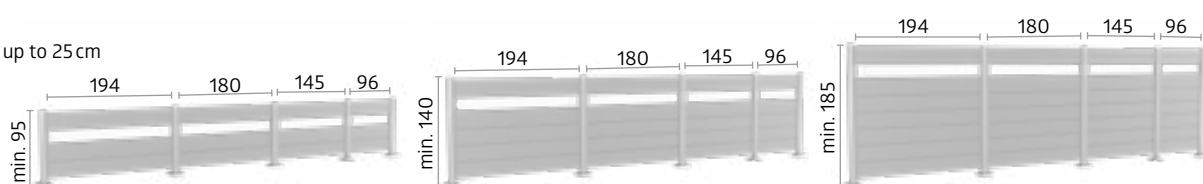

- Free-standing assembly or connection to house wall or similar possible
- Mounting accessories optionally available (see technical details)

Sizes (in cm)

Posts:

Height adjustable: up to 25 cm

Diameter: 10 cm

★ Optional Accessories

Components

Wall panels (with or without glass panels) and the appropriate posts are required for a privacy screen.

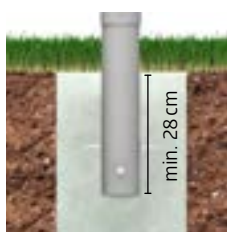

Variant 1: Post for anchoring, height-adjustable up to 25 cm

The base plate is bolted to a frost-proof concrete foundation using threaded rod anchors (optional available). Assembly on terrace tiles or wood/WPC boards is not sufficient.

Privacy Screen Combinations

The privacy screen can be extended both in a straight line and in different 90° angles.

All widths and heights are compatible with each other, making height gradations also possible.

Variant 2: Post for setting in concrete, height-adjustable up to 25 cm

With this variant, the post is set directly into the concrete foundation.
Size of foundation points:
min. 50 x 50 cm (varies depending on soil conditions)
min. depth: 80 cm (varies depending on privacy screen height)

MonAmi®, Metallic Dark Grey

MonAmi®

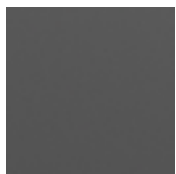

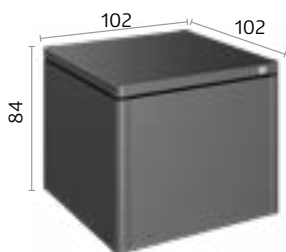

Composter

As "my friend" in the garden, the MonAmi® composter combines functionality with stylish appearance: elegant, smooth surfaces on the outside, inside everything required for efficient composting. Two centrally placed ventilation pipes create a chimney effect and ensure a reliable circulation of air, meanwhile the circumferential gap underneath the cover ensures that heat is transferred out of the composter. Even composting can now look great!

Size (in cm)

Volume:

725 l

Metallic
Dark Grey

Advantages

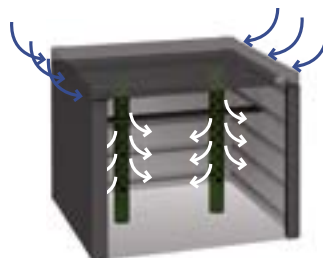

- Extremely durable
- Screw and rivet free surfaces

Functionality:

- Integrated rodent protection made of fibreglass fabric

Standard Equipment:

- Ventilation system ensures an optimal rotting process
- Sliding front wall panel makes it convenient and easy to empty
- Comfortable lid with gas spring

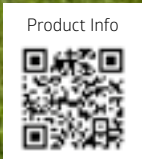

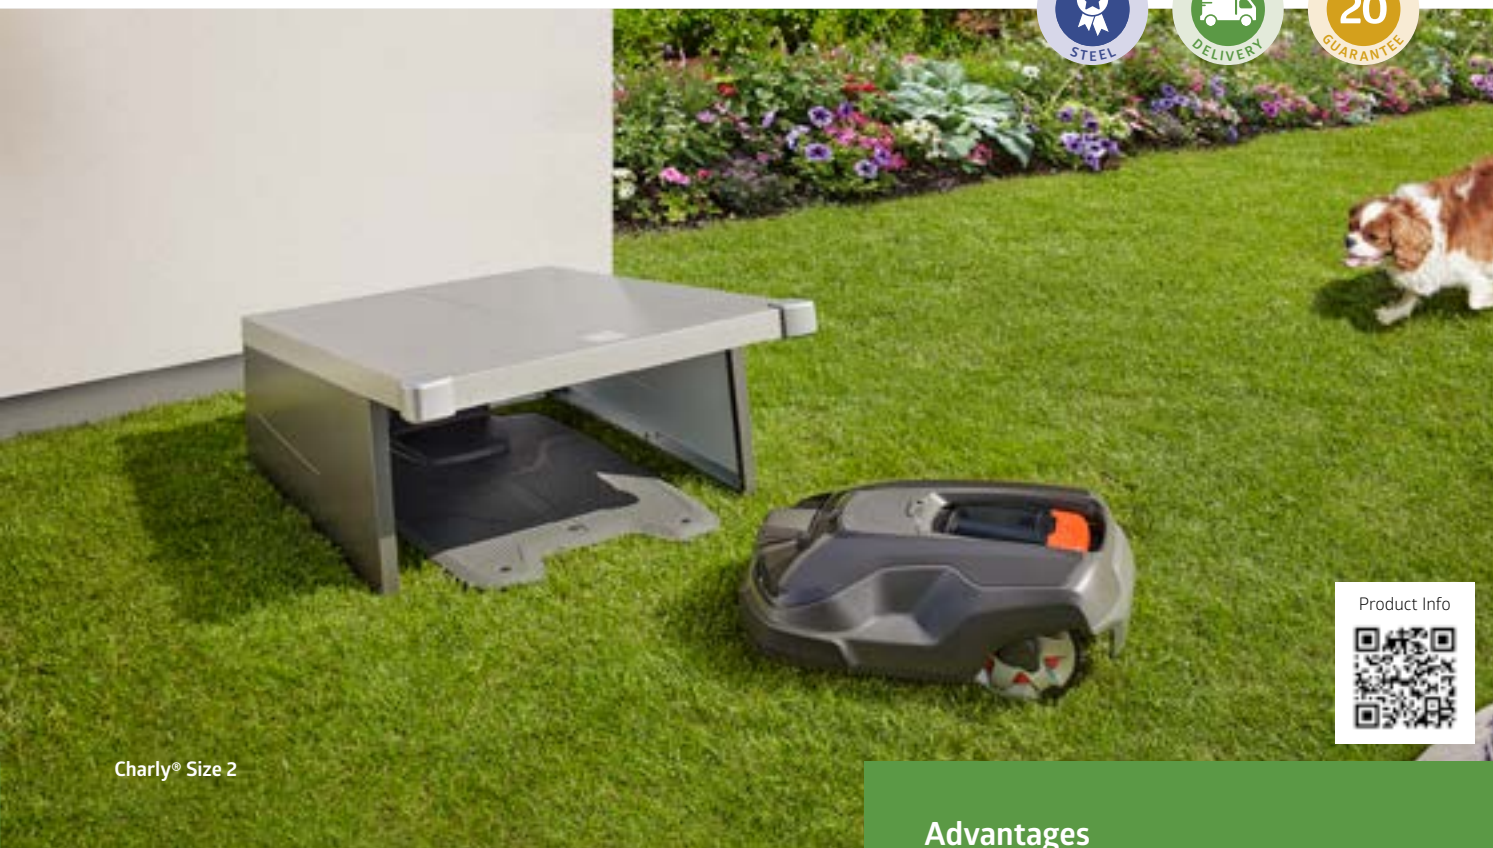

Ventilation Pipes

The integrated ventilation pipes provide an optimal supply of oxygen and circulation of air, which is essential for efficient composting.

Sliding Panel

Sliding front wall panel makes it convenient and easy to empty.

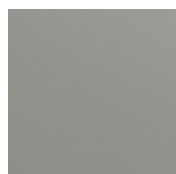

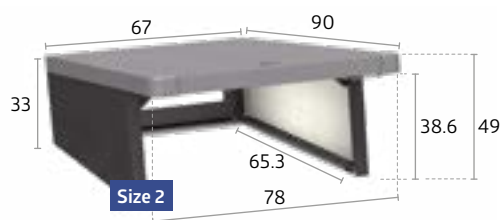

Charly® Size 2

Charly®

Robotic Lawn Mower Garage

A shelter from the rain is not only the least that your hard-working robotic lawn mower deserves, but is also highly recommended for the protection of your robot! Suitable for all commercially available models, Robot Garage Charly® offers all the comfort that robots and owners need. The folding lid offers easy access to the control panel.

Size (in cm)

Lid:
Metallic
Quartz Grey

Side Walls:
Metallic
Dark Grey

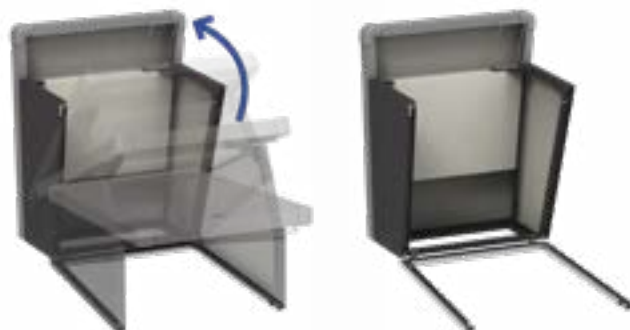

Advantages

Security:

- Folding-locking mechanism
- Corner protectors
- Ground screw fasteners

Functionality:

- Easy access to the control panel due to folding lid

Folding-locking mechanism

The folding lid with its locking mechanism offers easy access to the control panel.

WoodStock® Size 230, Metallic Dark Grey

WoodStock®

All-rounder

Firewood Storage and Equipment Locker in One

Nothing conjures up a cosier atmosphere than a blazing fire burning in the chimney on a cold winters day. But where to store the firewood? The WoodStock® provides the tidy and lasting solution for this question. During the summer it offers plenty of space for garden furniture and equipment. The possibility of attaching it to the house wall has proven to be particularly practical.

Metallic
Silver

Metallic
Quartz Grey

Metallic
Dark Grey

WoodStock® Size 300, Metallic Quartz Grey

Advantages

- Stability because of massive aluminium frame

Security:

- Integrated gutter on the front side
- Universally applicable for garden tools
- Wide range of accessories available

Functionality:

- Screws and anchors for fixation to the ground

Product Info

Sizes (in cm)

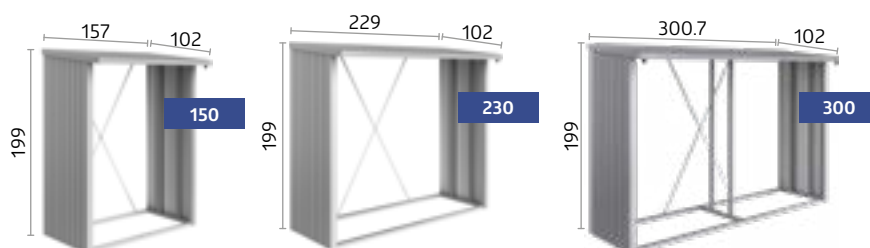

Volume:

Size 150: 2.1m³

Size 230: 3.1m³

Size 300: 4 m³

Possible to store wood in two rows
(max length of firewood: 35 cm)

★ Optional Accessories

Aluminium Floor Panels

High quality aluminium chequer plate, protects the stored wood and gardening equipment from moisture.

Back Wall

Made from galvanized, polyamide coated steel.

Door Package

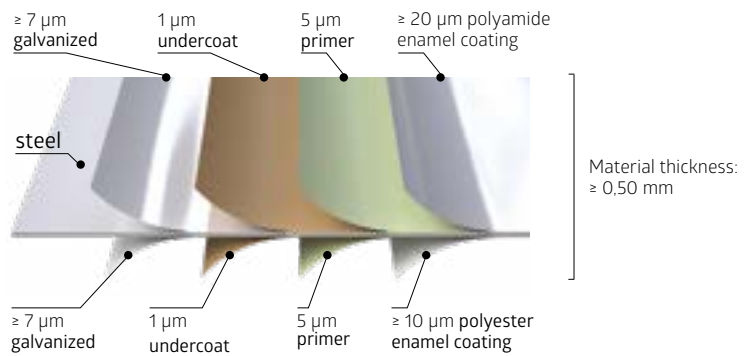

(suitable for size 150 & 230)

Double door fitted with T-handle cylinder lock and organiser system on the inside of the doors, Door opening: 135 x 171 cm (W x H).

Why Metal:

- + No Painting
- + The high-quality steel used by Biohort does not deform and remains in shape for decades.
- + The hot-dip galvanised, polyamide enamel coated steel used by Biohort is "fireproof" in accordance with EN 13501-1 (Class "A1").
- + Even premium German car manufacturers trust the same steel as we do.

Exterior

Interior

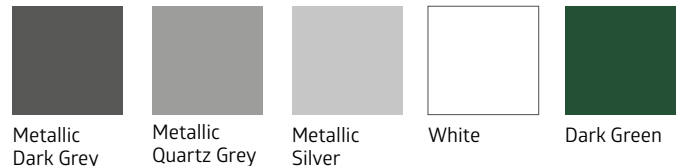

Material

Biohort uses a **hot-dip galvanised steel** with an additional **stove enamelling** with polyamide for its products. Biohort therefore provides a **20-year guarantee** against corrosion with a clear conscience. The prerequisite for this is that no aggressive substances (e.g. chlorine, salt, etc.) are stored and that there are no aggressive environmental conditions such as proximity to the sea or exposure to road salt.

Biohort Colours

The colour lacquers used are specially produced for us and do not correspond to any **RAL number**. Since many Biohort dealers have show models or original colour samples, we recommend visiting them before your purchase. Furthermore, you can request free material samples (colour sample sheets) on our website!

Did You Know?

Stability Test

A scientifically supervised test in the wind tunnel of the Vienna University of Technology certifies that Biohort garden sheds can withstand wind loads of up to 150 km/h (wind force 12) when properly assembled and anchored. Optimally designed profiles and the use of stainless steel screws further contribute to the durability of our products.

Sustainability is Our Claim

As an Austrian family business, we have been focusing on uncompromising sustainability for over 30 years. We are aware of our responsibility and always act according to the credo: **Today's actions have a decisive impact on tomorrow – economically, ecologically and socially!**

To Love the Environment

We focus on sustainable and environmentally friendly production. Biohort products have a very **long service life** and the processed steel plate is up to 100 % recyclable. Short delivery and transport routes ensure low CO₂ emissions and our **packaging** is almost entirely made of recyclable material. Intra-company transport is carried out 100% by **electric vehicles**.

All our company buildings are equipped with **photovoltaic systems**. With the solar power we produce ourselves, we cover one third of the annual electricity requirements of our production. We currently cover 10 % of the heating energy requirements of our company buildings with **heat pumps** and in future an additional 50 % with **biomass heating** from our residual wood. In total, almost half of our total energy requirements can be met from our own, sustainable sources.

Steel is 100 %
Recyclable
